Kristine,

Here is a preliminary list I have compiled so far. Not sure how many more we really need to show that people have used groundwater from that area for a supply.

Portland Harbor Water Supply Wells.doc

Let me know if you want to continue next time I have free time..... Just received another batch of PH RI documents.

Rene

Subject Info about drinking water well

I am reviewing BPA's 104(e) response. They are describing the St. Johns substation on 12567 N. Columbia Blvd. BPA indicates that a drinking water well was located on the site since 1940 and was abandoned in 1997.

FYI.
